Our History:

CobbleStone has a long and distinguished track record of providing leading contract management software.

1995 – Launched Contract Management Tracking System (CMTS) as the first off-the-shelf contract management software as a download and purchase system in 1995 under Global Business Group. Global Business Group offered computer software and computer technical services.

1998 - Launched Contract Web Enterprise as the first online data driven system for comprehensive contract management with custom user-defined fields, custom-reporting, and email alerts. Contract Web revolutionized the market by being the first to offer a hosted (SaaS) software solution and becoming early adopters of web enabled technologies.

2000 - CobbleStone Systems was formed and emerged as a private spinoff from Global Business Group in 2000 as the contract management software customer based and demand expanded.

2001 – CobbleStone Systems incorporated as CobbleStone Systems Corporation to continue to focus solely on contract management software offering Contract Web and the newly launched Contract Insight Desktop Edition built on Microsoft's revolutionary .NET Framework.

2005 – CobbleStone Systems launches Contract Insight Enterprise Edition Contract Management Software to continue leading the industry with advances in unlimited user-defined fields, document template drafting, full reporting and built-in report designer/builder, vendor/client gateways, client information request, and much more over the web.

2009 – CobbleStone Systems continues to be a leader with contract management software. Expands to large scale enterprise system application by becoming a Federal U.S. GSA Vendor. Awarded Statewide contract that enables the State of Colorado to manage over \$3 billion in statewide contracts.
